Profile

Experienced Front-end Developer proficient in JavaScript and React, with 4 years of experience in large-scale projects.
Graduated in Information Systems, my passion for web development drives me to create efficient solutions that enhance the user experience.
Feel free to browse through my projects and don't hesitate to reach out if you have any questions or if you're interested in working together.

Professional Experience

Software Engineer - Livelo ✈ *Livelo*   2021 Nov – present
As a Software Engineer on the travel team, I am responsible for airline tickets, hotel accommodation, car rentals and, especially from 2023 onwards, the transfer of points between airline partners on Livelo, the largest rewards program in Brazil. I work on the development and evolution of the entire travel flow on the website and app, fixing bugs and performing deployments in production. I am also responsible for dealing with legacy codes, developing new layouts, performing code reviews, conducting refinements and studies, as well as using pipelines and their processes in a complex architecture and environment. The technologies I use include HTML, CSS, JavaScript, React, Typescript, React Native and Java with SpringBoot, as well as libraries such as Knockout.js, mainly operating Oracle Commerce Cloud and recently Content Stack CMS.

Junior Developer - Livelo Marketing ✉, *Livelo* ⬈   2021 Sep – 2021 Nov
I was involved in email development within Livelo's marketing team, creating advertisements for the company and its partners using technologies such as HTML, CSS, and Javascript. Additionally, I utilized libraries like GULP.JS to enhance the development process and optimize the performance of emails. Deployment of images and emails on AWS servers was also employed to ensure secure and efficient delivery to recipients.

Junior Developer - SaveLivez - **Startup** 🩸, *SaveLivez*⬈   2021 Feb – 2021 Aug
Web development of dynamic and responsive pages using the latest technologies such as Javascript, React, Next.js, and Chakra UI in the social project SaveLivez, which combines technology and social engagement to combat blood shortages in Brazil. Through this project, I was able to develop my programming skills and contribute to an important cause simultaneously.

Internship - Front-end at Compass UOL, *Compass UOL* ⬈   2020 Nov – 2021 Feb
I participated in a Internship program/study track at Compass UOL that offered practical tests and complete projects using the most relevant technologies in the market. Throughout the process, I had the opportunity to apply the knowledge acquired and enhance my skills in technologies such as HTML, Javascript, React, Next.js, Docker, among others.

Skills

- Javascript
- Next.js
- KnockoutJS
- Git
- Styled-components
- Jenkins
- React
- TypeScript
- Java
- Docker
- GitLab
- Cypress
- React Native
- Spring Boot
- Zod

Education

Bachelor's Degree in Information Systems,
Universidade do Sul de Santa Catarina ↗
The merge between technology and business, equipping you to plan, design, develop, analyze, and manage multiple information systems.

2019 – 2023
